## PX30X Digital Flash

### Highlights

---

The Sunpak PF30X flash is the perfect accessory for today's digital SLR cameras. Built flash works well when the subject is close, but when the distances increase, they just don't supply the amount and quality of light for great images. For great contrast and bright colors the PF30X provides the power and flexibility that you need to make a great DSLR camera even better. With a five position bounce head images come out with a more pleasing light and illuminations and without harsh shadows that we all hate. For ease of use, bright LED controls make it effortless to use.
